

NIÑO DAIÑELL M. AUSTRAL

25 JP Rizal Victoria, Laguna • 09764001057 • nino.dainell.austral.com

Motivated and adaptable individual with a strong passion for continuous learning and skill development. Eager to embrace new technologies, adapt to evolving challenges, and contribute effectively to team goals while expanding professional expertise.

WORK EXPERIENCE

Entry-Level Web Developer (Full Stack)

National Center for Mental Health | Oct 2024 - Present

- Assist in designing and developing systems tailored to meet the operational needs of the National Center for Mental Health (NCMH)
- Monitor and maintain existing systems to ensure performance and reliability.
- Troubleshoot technical issues and implement timely fixes to minimize downtime.
- Support the integration of different systems through Restful APIs
- Ensure systems adhere to data protection policies and comply with relevant healthcare regulations.

Data Analyst

Accenture | Jan 2024 - Oct 2024

- Analyze user-generated content to ensure compliance with the platform's policies, community guidelines, and legal standards.
- Evaluate content against established criteria to identify potential violations or areas of concern.
- Implement corrective actions for content that breaches platform rules, such as issuing warnings, flagging inappropriate material, or removing content as necessary.

PROJECTS

Integrated System of Allied Services (ISAS) — Integrated Hospital Information System

- Revamped login module from Laravel to React, ensuring API compatibility and enforcing user roles and permissions.
- Developed the Patient Census module to track patient counts per pavilion, enabling verification and tallying of admitted patients.
- Built the Anatomical module for doctors to create specimen requests, routed to pathologists for examination and result uploads.
- Implemented a comprehensive Audit Trail and Recent History module to log all system activities, including form generation, request progress, approvals, and user logins/logouts.
- Revamped the For Cancellation module from Laravel to React, replicating original functionality while applying updated Figma-based designs.
- Designed and integrated Acknowledgement and UIS forms using JasperSoft Studio for seamless document accessibility.
- Delivered system enhancements, including UI updates based on Figma and adjustments to backend/frontend logic for improved functionality.

Santa Cruz Public Market Management System — Market Management System

- Developed a user interface to display available slots/shops, including owner details, rental rates, and electricity costs.
- Built the admin module to manage rent and utility rates, perform CRUD operations on users/staff/collectors, verify payments, issue receipts, and manage sections, buildings, and shops.
- Created the staff module to handle CRUD operations for user details, verify payments, and print receipts.
- Implemented the collector module to process payments and notify staff of completed transactions for receipt generation.

Batis ng Makiling Resevartion System — Resort Reservation System

- Designed a responsive landing page to showcase resort amenities and provide quick reservation access.
- Built the admin module to manage staff and user accounts, implement CRUD operations for reservations, and verify payment transactions.
- Developed the staff module to handle reservation management and validate customer payment receipts, streamlining operational workflows.

Solar System Educational Game — Educational Game Platform

- Developed a Flip a Card game where players match similar solar system-themed cards.
- Built an Alignment of Planets game allowing students to arrange planets from the Sun to Neptune in correct order.
- Created a 3x3 Jigsaw Puzzle featuring the Sun, Moon, and Earth.
- Designed a Multiple-Choice quiz for identifying Earth and atmosphere components.
- Integrated an embedded YouTube learning video to supplement interactive activities.
- Implemented a Moon Phase placement puzzle with a word bank for students to match names to images.
- Built a Spelling game where students answer questions by selecting correct spellings from given letters.

INTERNSHIP

Programmer Intern (Full Stack)

Eastmart Technology Innovators Inc | April 2023 - May 2023

- Developed and maintained web application features using Laravel framework
- Participated in debugging, code reviews, and optimization to improve application performance and security.
- Implemented authentication, validation, and CRUD functionality following Laravel best practices.

CERTIFICATE

JavaScript Essentials 1

August 2025

DICT-ITU DTC Initiative

Earned comprehensive training in JavaScript, mastering core programming concepts, debugging, and best practices. Prepared for JSE and JSA certifications, building a solid foundation for impactful contributions in web and software development.

3rd Place

JavaScript Essentials 2

August 2025

DICT-ITU DTC Initiative

Expanded knowledge of JavaScript through advanced concepts including object-oriented programming, functions, and asynchronous programming. Gained practical skills applicable to front-end, back-end, and testing roles, building a strong foundation for entry-level development positions.

2nd Place

ACHIEVEMENT

1st Codex: Inter-SHS Programming Competition

Malayan Colleges Laguna

Code Fest: Tagisan ng Talino 2019 Local Level

STI College - Santa Cruz

EDUCATION

BSIT: Web and Mobile Application Development

2019 - 2023

Laguna State Polytechnic University

Technical-Vocational (ICT)

2017 - 2019

STI College Santa Cruz Laguna

SKILL

- **Programming Languages:** TypeScript, JavaScript, PHP, C#, HTML, CSS
- **Frameworks & Libraries:** MERN Stack, React, Laravel, Bootstrap, Tailwind, React Query, TanStack,
- **Databases:** MySQL, MongoDB
- **Tools & Version Control:** Git, GitLab CI/CD
- **Web Development:** RESTful API design and integration
